Aspect-Perception and the History of Mathematics

DATE: Thursday, January 25

TIME: 4:00–5:00 pm

LOCATION: Logic Center, Room 420, 2 Arrow Street

The meta-concept of aspect-perception is first discussed in connection with the history and practice of mathematics. Then, in its terms and to draw out the concept, a selection of vignettes are discussed: Pythagorean Theorem, Irrationality of \sqrt{n} , the Derivative of Sine, and the Pigeonhole Principle.
