The True and the Good (111175)

Bernhard Nickel

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How you live your life is not just a matter of taste. The basic outlook of value and perspective that each of us adopts as we make decisions large and small are more than mere opinion. They are commitments that are open to deeper understanding and critique. This course introduces you to the practice of such critique and prepares you for its demands. It introduces you to the practice of philosophy. Issues include the nature of knowledge, of the mind and self, and of right and wrong. We'll also consider race and gender in relation to these philosophical topics. We will pursue these issues by considering both traditional philosophical writers, such as Plato, Descartes, Locke, Kant, and Mill, as well as contemporary writers. Because this course is concerned with the students' active engagement with the material they encounter, this class will be taught in a highly interactive format. No prerequisites

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief.

Philosophy 6

Ancient Ethics and Modern Morality (133181)

James Doyle

2019 Spring (4 Credits)

Schedule:

MWF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An historical introduction to ethics, from the Greeks to, roughly, now. We begin with the concept of virtue in Homer and trace its development through Socrates, Plato, Aristotle, the Stoics and Aquinas. In the modern period we look, in a somewhat skeptical spirit, at the rise of the 'moral' as a supposedly sui generis category of reasons, traits, obligations etc, as this is found in Hume, Kant, Mill and others.

Philosophy 7

Introduction to Ancient Philosophy (114416)

Katherine Chambers

2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

The philosophy of ancient Greece forms the cornerstone of Western intellectual thought and culture. This course will survey themes in ancient Greek philosophy from the works of three major figures: Socrates, Plato and Aristotle. We will look at their views about how humans should act, the nature of the soul, what the world is like, and how we can have knowledge. In this course we will pay special attention to the arguments given by these philosophers for their views. The goal of the course is not to learn about Greek philosophy; the goal is to learn how to do philosophy. Like the Greeks, our inquiry will be aimed at finding the truth, and we will critically engage with the arguments given by the Greek philosophers to help us get there.

Philosophy 11

Philosophy of Law (156186)

Emilio Mora

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Is there a standing duty to obey the law? What is the relation between law and morality? How should judges interpret the constitution? Does the practice of judicial review compromise democratic values? When and in what manner may the state interfere with the conduct of its citizens? We will discuss these and other questions in this survey course on the philosophy of law. Significant attention will be devoted to questions that lie at the intersection of legal and political philosophy. The final part of the course will be determined in consultation with course participants and will be devoted to philosophical puzzles arising in the law.

Philosophy 12

Ethics of a Human Life (000012)

Katherine Chambers

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Ethical questions arise at every stage of a human life, from before a person is born until after she dies. We will explore the ethical questions that arise at familiar stages of a person's life: her conception, childhood, adulthood, death, and after her death. For example, is it bad to be born, to be a child, or to grow old? Why do we love some people and not others? What does it mean to get married? Does it matter what happens to us after we die? We will consider some surprising ways philosophers have tried to answer these questions, and we will think about how the arguments they make can help us better understand the ethical shape of a human life as a whole.

Ethics of Climate Change (205079)

Lucas Stanczyk

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How should governments respond to the problem of climate change? What should happen to the level of greenhouse gas emissions and how quickly? How much can the present generation be expected to sacrifice to improve conditions for future generations? How should the costs of mitigation and adaptation be apportioned between countries? Should significant funds be allocated to the study of geo-engineering? We will consider these and other questions in an effort to understand our responsibilities in respect of climate change, with a special focus on the structure of the analytical frameworks that have been dominant among policymakers.

Philosophy 102

Aristotle (112252)

Jacob Rosen

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

According to Aristotle's classification, philosophy is 'theoretical' if it concerns things we wish to know simply for the sake of knowing, not for the sake of doing or making anything. This course will be a close reading of selected passages from Aristotle's works of theoretical philosophy, especially his *Physics*, *On the Soul*, *Metaphysics*, and his logical works. We'll build up an understanding of his overall world picture, according to which the cosmos is eternal, finite in size, harmoniously ordered, and characterized by natural teleology (that's to say, things naturally are as they are for the sake of what is good). Above all, we will seek to understand the key concepts that Aristotle bequeathed to theoretical philosophy, such as substance, accident, essence, potentiality, necessity, and priority.

British Empiricism (114331)

Alison Simmons

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The canonical British Empiricists (Locke, Berkeley, and Hume) take us on a journey from very sensible philosophical starting points to rather extravagant sounding philosophical conclusions. We will explore their influential arguments concerning such things as the self, the external world, mind and body, natural kinds, concepts, language, science, skepticism, and the role of philosophy itself. We will also explore Lady Mary Shephard's attempt to pull us back from the philosophical brink that the Empiricists lead us to.

Philosophy 129 Section: 01

Kant's Critique of Pure Reason (117823)

Samantha Matherne

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

In this course, we will work through Immanuel Kant's *Critique of Pure Reason* (1781/87). In analyzing this text, we will explore the account of metaphysics, epistemology, and philosophy of mind that Kant defends. More specifically, we will address the negative aspects of his project, including his criticisms of rationalism and empiricism. We will also examine his positive views regarding the nature of the mind, the nature of experience, the metaphysics of transcendental idealism, and the foundations of mathematics and natural science. At the end of the course we will consider the limits and prospects of Kant's critical project. In the former vein, we will discuss concerns pertaining to Kant's view on race. In the latter vein, we will address Kant's hope of building a system of nature and freedom.

Phenomenology of Lived Experience (000136)

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

In this course, we will explore phenomenological approaches to lived experience, i.e., the experience we have, as embodied beings, who are embedded in a world and entangled with others. We will begin by looking at treatments of the phenomenology of lived experience in general in texts by Franz Brentano, Edmund Husserl, Martin Heidegger, and Maurice Merleau-Ponty. We will then address attempts to work out the phenomenology of specific modes of lived experience in Simone de Beauvoir's *The Second Sex*, Frantz Fanon's *Black Skin, White Masks*, Emilio Uranga's "Essay on an Ontology of the Mexican," and Sara Ahmed's "Orientations: Towards a Queer Phenomenology."

Heidegger's Being and Time (000138)

Sean Kelly

2019 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A close reading of Martin Heidegger's *Being and Time*. Topics from Division I of the book include: In what sense, and on the basis of what, is the world we inhabit intelligible? In what sense do we inhabit such an intelligible world? And what, after all, is the relation between what is and what we understand there to be? Division II of the book addresses existential issues such as: death, guilt, authenticity, history, and temporality. We aim to read the entire book.

Philosophy 145

Modal Logic (156023)

Mark Richard

2019 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Modal logic in the first instance is the study of the logical properties of modal words like 'must', 'may', 'necessarily', and 'possibly'. The standard way of explaining the meanings of modal idioms like 'necessarily' --in terms of "truth at a possible world" --has been taken over by many linguists as a tool to analyze meaning in natural language (so-called 'possible worlds semantics'). It has also been used to study the nature of provability in formal systems, to analyze programs in computer science, and to model temporal processes.

This course is first and foremost a course in logic, but one that attends to modal logic's uses in philosophy and the study of language. One of the goals of the course is to introduce you to doing metatheory--proving things like completeness and soundness for logical systems. We also look in some detail some applications of modal logic and its semantics, discussing such things as: semantics for counterfactual conditionals; mutual knowledge and conversational context; the use of modal logic to model such things as computer programs and non-standard (e.g., intuitionistic) mathematical systems.

The course does not suppose that you know any logic. We do move pretty fast through elementary logic; you may find the course challenging unless you have taken and remember some of an elementary logic course like EMR17. Grades will be determined by: class attendance, four to six problem sets, a take home final. The primary text for the course is Hughes and Cresswell, *A New Introduction to Modal Logic* (Routledge).

Philosophy 149S

Foundations of Space-Time Theories (000149)

Peter Koellner

2018 Fall (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

Space and time have always seemed rather mysterious. Yet space and time are ubiquitous in that the events of everyday life and physics are described within the framework of space and time. What exactly is this framework? Is it merely conventional or does it capture a fundamental feature of reality? What is the relationship between space and time? Are they independent of one another? Are they intertwined? Are they fixed? Can they be manipulated? In this course we will try to get clear on such questions by tracing the historical development from the time of Newton to the present, while also employing tools of modern geometry to sharpen the fundamental notions and the central questions. Some of the main spacetimes we shall see along the way are: Newtonian Spacetime (the spacetime associated with everyday common sense), Minkowskian Spacetime (the spacetime of special relativity, where space and time are intertwined), and Einsteinian Spacetime (the spacetime of general relativity, where space and time can be warped and manipulated). We will see that our understanding of spacetime has undergone radical transformations, that there has been a great deal of progress in our understanding, and we shall get into some of the more fascinating issues that arise with our contemporary understanding, issues involving black holes, singularities, time travel, and other spacetime anomalies.

Prerequisites: An introductory course in linear algebra and calculus.

Reproductive Ethics--Whose Body is it, anyway?: Proseminar (000171)

Katherine Chambers

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

We are generally prohibited from acting on the bodies of other persons. I cannot decide for you what food you will put in your body, what exercise (if any) you will do, what color you will dye your hair, or whether you will have corrective eye surgery. However, parents are generally allowed to act on the bodies of their children: they feed them, change their diapers, cut their hair, make them play sports, make major medical decisions, etc. Reproductive technology has now made it possible for parents to shape their children's bodies by creating children with specific physical traits. In this seminar, we will explore the limits of parental permission to shape the bodies of their future children. We will ask the question: whose body is it anyway? We will consider questions like the following: Is there a moral difference between making a child wear glasses and selecting for a child with good eyesight? Should parents be permitted to select for disability? Do parents have an obligation to enhance their children's physical or mental capacities? We will consider how thinking about the obligations parents have to their existing children bears on what prospective parents owe their future children.

Philosophy 176G

Groups and Political Philosophy: Proseminar (000176)

Emilio Mora

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** 30

In this course we will be examining the role and significance of groups (social, cultural, and institutional) in various areas of political philosophy. Although we will consider a variety of issues we will concentrate on two principal topics. Firstly, we will consider the significance of groups in relation to the claims and demands of social and political justice. Should social groups be thought to have a fundamental normative significance in political philosophy or must we reduce all political claims and interests to the claims and interests of individuals? What is the significance of social groups to questions of distributive justice? What sort of social groups are relevant to questions of distributive justice and why are they relevant? Are there group membership rights? What is the nature and foundation of these rights, and do these rights conflict with liberal political thought? The second dimension of the course concerns the significance of groups as subjects to the demands of justice. Is it only the political community, taken as a group, that is answerable to fundamental principles of social justice, or do these principles also govern the individual conduct of a political community's members? Do national groups bear responsibility as a group for what the group does? Can social groups in a society be deemed collectively responsible for certain social and political outcomes? What is the nature and mechanism of this group responsibility? Finally, we will consider the moral status and responsibilities of corporate 'group agents'.

Historical Injustice: Proseminar (218177)

Emilio Mora

2018 Fall (4 Credits)

Schedule: F 1200 PM - 0245 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 30

What is the moral and political significance of past injustice in the history of a political community? In a variety of national contexts, the redress of historical injustice has struck many as both a legitimate and urgent political cause. Others argue that, since both the original victims and perpetrators of historical injustices are dead, there are no persons who have valid claims against these historical episodes nor, at any rate, are there any individuals who can be rightly held responsible for injustices that predate their existence. This course examines the underlying philosophical questions that underpin and sustain these disagreements, focusing on the issues of Injury, Responsibility, and Justice. In the first topic, we examine a number of accounts characterizing the nature, and defending the legitimacy, of historical injustice claimants as well as the main lines of objection to these claims. In the second topic we examine questions of responsibility. Which contemporary parties, if any, can be held responsible

for the effects of historical injustice, and what is the basis and nature of their responsibility? In the final topic, we examine some of the questions and difficulties regarding the administration of a scheme of historical rectification, and we will seek to understand the relation of historical rectification to the project of social justice more generally. Would historical injustice claims be made redundant or otherwise be addressed by the implementation of an egalitarian scheme of distributive justice for all? Conversely, do historical injustices give rise to social and political complaints that must be specifically addressed by a scheme of historical rectification?

Inequality (205060)

Lucas Stanczyk

2018 Fall (4 Credits)

Schedule: MWF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Many people believe that growing inequality is one of the defining challenges of our time. In this class, we will examine some of the main problems thought to be raised by inequality through the lens of several systematic ways of thinking about social justice.

Class Notes: This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Ethical Issues in Social, Cultural, and Artistic Representation (000182)

Emilio Mora

2019 Spring (4 Credits)

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

In this course we will examine a range of issues which we might, very loosely, term questions of social, cultural, and artistic representation. For instance, the construction, deployment, and celebration of historical narratives are a familiar part of the political pageantry in the life of nations. What are the ethical constraints and imperatives relating to the representation of these national histories? How do these injunctions relate to present political norms of equality and inclusivity and the demands of social cohesion? Consider, also, representational questions that arise in relation to norms of social interaction. What, for instance, might be considered wrong with cultural appropriation? When is it wrong to allow social stereotypes to inform one's interpersonal interactions, and should this wrong be understood in primarily moral or epistemological terms? Finally, consider ethical issues relating to our engagement with (construed broadly) artistic representations. How can we ethically enjoy tragedy? On the face of things it would appear paradoxical or else the mark of a sadist. Are pornographic representations of immoral acts wrong to

consume and enjoy? Are there any special ethical constraints on what may be represented in a video game? Can we ethically represent the Holocaust in any artistic medium? Can we continue to enjoy the products of artists who have engaged in immoral actions? Although we should not expect a set of master principles to govern this range of topics, we might realistically hope that the answers we give, and the philosophical difficulties we encounter in any one topic will help illuminate our treatment and investigation of the others.

Aesthetics (111785)

Richard Moran

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An examination of some texts of philosophical aesthetics from the 18th and 19th centuries, texts which either represent or anticipate the Romantic period. Some themes to be taken up will be the role of emotion in art (from the point of view of both artist and audience), the nature of expression and its relation to the will, problems of sincerity and authenticity, and art or poetry as sources of knowledge. Readings will include the following authors: Hume, Mothersill, Kant, Mill, Diderot, Schiller, Hegel, Sontag, Cavell, Wilde .

Philosophy 188

Philosophy and Literature: Proust (127792)

Richard Moran

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will attempt to achieve a sense of Proust's great novel, *In Search of Lost Time*, as a whole, necessarily in an abbreviated form, but with the aim of tracing the plan that Proust worked out when he began the project. The bulk of the reading will be in Proust's text, but there will be regular secondary readings in philosophy and in the critical literature on Proust. Philosophical themes to be emphasized will include: the nature of subjectivity and the problem of other minds, the strategies of solipsistic desire, freedom and dependence, *amour-propre* and the desire for approbation, the nature and limits of the will (including 'involuntary memory'), personal identity and artistic vocation, the will to knowledge and self-deception.

Philosophy 229

Kant's Theory of the Imagination (000229)

2019 Spring (4 Credits)

Schedule: M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

In this course, we will explore the role the imagination plays in Immanuel Kant's philosophical system, including his account of perception, cognition, beauty, sublimity, metaphysics, and morality. We will look at major works from the Critical period, including the *Critique of Pure Reason* (1781/87) and the *Critique of the Power of Judgment* (1790), as well as his lectures on anthropology and metaphysics from the 1770s and 80s, "What Does it Mean to Orient Oneself in Thinking" (1786), *Religion within the Bounds of Mere Reason* (1793), and the *Anthropology from a Pragmatic Point of View* (1798). Our goal will be to see whether Kant defends a unified theory of imagination across these various texts.

Topics in Philosophy of Language (114439)

Mark Richard

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

Propositions are supposed to be the primary bearers of truth and falsity as well as the objects of psychological and illocutionary states such as belief, fear, desire, assertion, promising, etc. A standard view of meaning has it that a sentence's meaning should be theorized in terms of propositions, with the meaning of sentence S a rule that determines the proposition expressed by a use of S.

In this seminar we will look at historically important and contemporary work on the notion of a proposition in philosophy and semantics. Topics discussed may include: debates about the nature of and the need for propositions; debates about the nature of propositional attitudes and the extent to which they are or are not tied to language; debates about 'fineness of grain' of propositions.

You don't need a background in philosophy of language to take this course. But it is intended for graduate students in philosophy, and so philosophical sophistication is expected; students from other disciplines should consult with the instructor before taking the course.

Course requirements are: active participation in class, a class presentation, and a final paper. We will meet once a week for about two and a half hours.

Punishment and Imprisonment (000288)

Tommie Shelby

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This seminar will examine classic and recent philosophical theories of punishment with a focus on incarceration. We'll critically discuss justifications of punishment based on deterrence, retribution, fairness, forfeiture, consent, public censure, and moral education. We'll also examine the moral considerations for and against rehabilitation and incapacitation through incarceration. Considerable attention will be given to assessing the case for the abolition of prison as a form of punishment.
